805.698.4720 | r3aguila@ucsd.edu |San Diego, CA 92092 | linkedin.com/in/aricardoaguilar

EDUCATION

University of California, San Diego | Mathematics-Computer Science, Minor Cognitive Science *June 2023*

Coursework Discrete Math and Probability Theory, Advanced Data Structures, Efficient Algorithms Design, Principles of Data Science, Computer Architecture, Linear Algebra, Vector Calculus, Differential Equations, Graph Theory.

WORK EXPERIENCE

Bioinformatics Research UCSD | Research Intern *Feb 2021 – June 2021*

- Developed a Web application for medical professionals that parses large files of raw data and displays graphs and other forms of data in order for easier data visualization.
- Gained vast experience using React Framework and Java Script.
- Worked along with Industry professionals resulting in a better understanding of industry project development process.

Independent Tutor | Tutor *Jul 2020 - Present*

- Tutored over 50 college students taking lower division Computer Science classes.
- Increased fluency with coursework/material covered in lower division classes.

Private Bank | Intern *Mar 2021 –Jun 2021*

- Developed a web app that handles large input files and loads them into a database where information is saved.
- Populated webapp with information from MySQL server
- Improved skills with SQL ,Java Script and ASP.net core framework

LEADERSHIP EXPERIENCE

Komodo Software| Co-Owner **http://www.komodomonitors.software/** *Dec 2020 – May 2022*

- Co-founded a startup, Komodo, providing 24/7 monitors for our clients in order to notify them when very sought out items are back in stock.
- Managed a small team of three to push last minute updates, developing quick thinking and great communication skills.
- Developed how to work with customers and not only problem solve technical issues but public relation issues.

Interfraternity Council| President *Dec 2021 – Present*

- Delegate team of 12 to conduct and ensure safe operations occurring on campus.
- Managed 100k budget to contribute to local charities and benefit the community.
- Oversee the planning and execution of the Office of College Affairs programs and events.

SOFTWARE PROJECTS

Object Recognition AI *June 2022 – July 2022*

- Developed IOS software that identifies objects when put under your Iphone camera in less than 7 seconds
- Implemented Apples Food Model and improved fluency with Machine learning models

Huffman Tree Encoder/Decoder *Nov 2020 – Dec 2020*

- Developed tool that compresses and uncompressed files using Huffman Coding in order to better understand file compression.
- Improved fluency with C++os stream.

Zoo App *Mar 2022 – June 2022*

- Generated a zoo app that implements efficient algorithms to give user optimal route to maximize visited exhibits.
- Deployed Google maps API and Snowflake DB to ensure wide implementation of app.

TECHNICAL STRENGTHS

Computer Languages Python, Java, Java Script, C, C++, C#, Assembly, MatLab, Bash, React, Swift

Tools & Frameworks Numpy, Pandas, PyGame, SeaBorn, Node.JS, Git, Vim, Ubuntu, AWS, Xcode, Android Studio
